Objective

Aspiring software developer skilled in C programming, data structures, and front-end web development. Eager to contribute to real-world projects and grow through hands-on experience.

Education

Bachelor of Technology in Computer Science & Engineering

Techno Bengal Institute of Technology | Current CGPA: 7.5 2023-2027

Class XII (Senior Secondary)

St Thomas' Day School (ISC) | 89% 2022

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Web Development

Technical Skills

- Programming Languages: C, JavaScript (basic)
- Web Technologies: HTML, CSS
- Concepts: Data Structures and Algorithms, Object-Oriented Programming
- Tools: Git, GitHub

Projects Academic and Personal

- **Data Structures & Algorithms Implementation in C**
 - Implemented core data structures including **Arrays, Linked Lists, Stacks, Queues, Trees, and Graphs** using C.
 - Developed searching and sorting algorithms with focus on **time and space complexity analysis**.
 - Organized code in a modular folder structure and documented usage using GitHub README.
 - Strengthened problem-solving skills and understanding of low-level memory management.

- **Personal Portfolio Website (HTML & CSS)**
 - Designed and deployed a personal portfolio to showcase technical skills and academic progress.
 - Utilized **CSS Flexbox/Grid** to ensure a fully responsive layout across mobile and desktop devices.
 - Followed semantic HTML practices to improve SEO and accessibility.
- **Student Management System (C)**
 - Developed a **menu-driven Student Management System in C** using **dynamic memory allocation**, enabling automatic resizing of data structures as records increase.
 - Implemented core operations including **add, view, search (by name/roll number), delete, and sort** students by **name, roll number, and highest marks**.
 - Integrated **file handling** to persist student records, ensuring data is **saved and reloaded across program executions**.
 - Structured the project with **modular .c and .h files**, organized into `src/` and `include/` directories, with a **Makefile** and clear **README documentation**.
- **Restaurant Website (HTML & CSS)**
 - Developed a **responsive multi-page restaurant website** (Home, Menu, About, Contact) using **semantic HTML and CSS**.
 - Implemented **Flexbox-based navigation and layouts** to ensure consistent design across mobile and desktop screens.
 - Integrated a **contact form** and focused on **clean UI, structured content, and basic accessibility practices**.
- **Tic Tac Toe Game (Python)**
Academic Project
 - Developed a console-based Tic Tac Toe game in Python as part of early coursework.
 - Implemented basic game logic, conditional statements, and user input handling.
 - Helped build foundational understanding of programming logic and control flow.

Key Coursework

- Design and Analysis of Algorithms
- Database Management Systems (DBMS)
- Operating Systems
- Computer Networks

Extracurricular & Achievements

- **Active GitHub Contributor:** Regularly documenting lab work and personal coding challenges.
- **Technical Problem Solving:** Solved problems on platforms like LeetCode/HackerRank
- **DSA GitHub Repository:** Maintained a structured Data Structures & Algorithms repository with regular commits, demonstrating consistency and continuous learning.
